	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Fetch the current menus for both Hillenbrand and Earheart ● Create a JSON file detailing which foods I do and don't like ● Have the foods in the JSON have a score for how much I do and don't like them ● Email myself the per meal results ● Run once a day	**Schedule - (For V2.0+)** ● Run autonomously every morning ● Other dining courts ● Dietary and allergy info ● Send over text instead of email ● Algorithm for varying food over time
Not Important	**Delegate - (Use a library)** ● Http requests ● Parsing api response ● Matching food names that are slightly different	**Delete - (Cut it)** ● Full web UI ● User accounts ● Calorie tracking ● Crowed size/wait times
